

AristoPay Project Workflow & Specifications

This document outlines the official platform workflow, user roles, pricing structures, and implementation rules as provided by the client.

1. Universal Rules & Registration

Universal Registration (Dual-Role Model)

- **Single Account Access:** Users register once with a single account.
- **Role Selection:** Upon registration, users select their primary role—**Service Provider (SP)** or **Client**.
- **Role Toggling:** Users can freely toggle between both roles from their dashboard at any time without needing separate accounts (similar to Fiverr's dual-role model).
- **Terms Agreement:** All users must agree to AristoPay Terms of Service and Trustap's Terms during registration.
- **Onboarding:** Trustap registration/onboarding is completed during the initial signup to enable transaction capability from day one.

2. Service Provider (SP) Flow

- **Step 1 — Registration & Login:** Provider registers, selects Service Provider as their primary role, and completes Trustap onboarding to unlock transaction capability.
- **Step 2 — Dashboard Access:** Provider accesses their dashboard to manage posts, proposals, active projects, and transaction history.
- **Step 3 — Service Posts:** Provider can create and publish their profile detailing their services. This is visible to all clients on the platform and is available on the **Free Tier**.
- **Step 4 — Communication:** Providers can message and communicate with any client regardless of their subscription plan. Communication is free for all users.
- **Step 5 — Proposals (Free vs Premium):**

- *Free Tier*: Provider can send proposals to clients.
- *Premium Tier*: Provider can both send proposals and receive proposals directly from verified clients. Both parties can initiate.
- **Step 6 — Identity Verification (Premium)**: Premium subscribers (\$29/month) complete identity verification via Veriff. Upon successful verification, they receive a visible **Verified Badge** on their profile to build trust.
- **Step 7 — Contracts (Premium)**: Premium subscribers can attach a DocuSign contract to any proposal and request a signature from the client before the project begins.
 - *Allowance*: 5 contracts included monthly.
 - *Overage*: Additional contracts cost \$2 each.
- **Concierge Service (Premium)**: Premium subscribers have access to a dedicated Transaction Concierge.
 - *Contact Email*: Concierge@AristoPay.co (priority email support).
 - *SLA*: Guaranteed response within 24 hours.
 - *Note*: This is handled operationally—no backend build is required at this stage.
- **Step 8 — Receiving Payment**: Once a client releases escrow funds through Trustap, the provider receives payment directly. Providers pay a **5% service fee** per transaction (unless promo applies).

3. Client Flow

- **Step 1 — Registration & Login**: Client registers, selects Client as their primary role, and completes Trustap onboarding to unlock transaction capability.
- **Step 2 — Dashboard Access**: Client accesses their dashboard where they can browse services, manage proposals, active projects, and transaction history.
- **Step 3 — Browsing Services**: Clients can browse all published service provider posts and profiles based on preferences.
 - *Free Tier*: Can search and browse.
 - *Premium Tier*: Allows filtering searches based on the verified status of prospective users.
- **Step 4 — Communication**: Clients can message and communicate with any service provider regardless of subscription plan. Communication is free.
- **Step 5 — Proposals**:
 - *Free Tier*: Clients can **receive** proposals from service providers only.
 - *Premium Tier*: Clients can both receive **and send** proposals directly to service providers. This limits unsolicited or fraudulent outreach from unverified accounts.

- **Step 6 — Identity Verification (Premium):** Premium subscribers complete identity verification via Veriff to receive a verified badge, signaling accountability and reducing payment risks.
- **Step 7 — Contracts (Premium):** Premium subscribers can request, receive, and sign DocuSign contracts directly within the platform before payment is made. (Document limit applies only to sending, not signing. Standard 5 contracts and \$2 overage rules apply).
- **Step 8 — Making Payment:** Clients pay through Trustap's secure checkout. Funds are held in escrow-style protection until the client confirms project delivery.
 - *Payment Channels:* Accepted via credit card or ACH transfer.
 - *Recommendations:* Transactions over 2,000 should go through Bank/Wire transfer, while transactions below 2,000 go through standard card payments.
 - *Service Fee:* Clients pay a **5% + \$0.40** standard protection fee.

4. Shared Transaction Flow (Escrow Mechanics)

- **Initialization:** Once both parties agree on terms and sign any attached contracts, the transaction is initiated through Trustap.
- **Merchant of Record:** Trustap acts as the merchant of record and manages the full transaction lifecycle including fund holding, payment acceptance, merchant payout (3% for AristoPay), fraud management, and issue resolution.
- **Escrow Hold:** Funds are held securely in escrow. Neither party can access the held funds until delivery is confirmed.
- **Release:** Upon the client's confirmation of project delivery, funds are released to the service provider.
- **Disputes:** All disputes and chargebacks are handled through Trustap's infrastructure.

5. Pricing & Fee Structure

User Pricing Rules

- **Sellers (Service Providers) Pay: 5%** (Standard Rate).
 - *Launch Promo:* First 90 days: **3%** seller fee → After 90 days: **5%** standard rate.
- **Buyers (Clients) Pay: 5% + \$0.40** per transaction (Trustap Standard Protection Fee).
- **Site Pricing Page Text:** "Sellers pay 5%. Buyers pay Trustap's standard protection fee."

- **Minimum Transactions:**
 - **Card Payments:** \$150 minimum transaction size.
 - **Bank/Wire Transfers:** \$300 minimum transaction size.
- **Accepted Currencies:** USD, EUR, GBP, CHF.

Trustap Basic Integration Costs

Below is the default Trustap fee structure for the basic integration:

Fee Component	Trustap Rate / Details
Monthly Platform Fee	Start for Free
Integration Fee	\$249
Variable Fee	5.0%
Fixed Fee	\$0.40
Bank Transfer	2% - Minimum \$25
Instant Payout	2%
Customer Support	10 Dispute & Support Tickets
Additional Ticket Fee	\$10.00
Chargeback Management	\$0.00
Extra Chargeback Fee	\$50.00

6. Critical Technical Implementation Rules (Developer Flags)

Important

Backend-Level Gatekeeping:

The proposal-sending permission for clients is tied directly to their premium subscription status. **This must be enforced at the API/backend level**, not just hidden in the frontend UI. This is a core fraud prevention mechanism, not just a feature gate.

Important

Contract Signing Restrictions:

Contract signing and storing is **only available through Premium** for both Service Providers and Clients.

Note

Admin Dashboard Rule:

There is no need to implement user verification actions inside the admin panel, as that is automatically handled by Veriff. However, the admin panel **must** support the ability to remove/delete users.

Blog Management: The blog management module is no longer required on the dashboard.

Warning

Unverified State:

Any unverified or warning URL should clearly indicate a warning status.
